## Work Experience

### Patricia Technologies

Lagos, Nigeria

#### FRONTEND SOFTWARE ENGINEER

July 2021 – June 2023

- Implemented and optimized the admin dashboard of the crypto payment management system for the Patricia applications using React.js, Next.js, and TailwindCSS, resulting in an 80% improvement in payment management.
- Wrote and documented CRUD APIs related to customer payments on the Vaunt Laravel application
- Implemented logging and monitoring using Sentry which helped identified bugs in the application, improving uptime by over 25%.
- Increased the security of the payment admin dashboard by 70% by implementing token-based Two-Factor Authentication, ensuring secure access to the payment system.
- Refactored the data fetching layer of the application to use React Query, resulting in a reduction of duplicated code and improved performance.
- Successfully enhanced the frontend resilience of the crypto payment management system by writing component and integration tests using Jest and Playwright, reducing app crashes in production by 90%.
- Reduced runtime bugs in the production environment of the payment management system by porting the JavaScript-based React application to TypeScript, ensuring smoother performance, type-safety and efficient debugging.

### Generative CAD Services

Lagos, Nigeria

#### SOFTWARE ENGINEER

December 2021 – June 2022

- Developed the landing page, about page, and contact page of the company's website which improved online presence by 80%.
- Authored a learning platform for the company which improved knowledge sharing by 100% using Next.js, PostgreSQL, Laravel, Redis, and Typescript.
- Built software plugins using WebAssembly that allows viewing of 3D models on the main website frontend which improved user engagement by 60%.
- Worked on the SEO of the main website to increase organic visits by 100% using SEO tools and meta tags.

### Esettlement Ltd

Lagos, Nigeria

#### SOFTWARE ENGINEER INTERN

May 2020 – July 2020

- Enhanced the performance of the Paycenter admin application by 67% by fixing memory leaks from state transition between pages.
- Add new components such as modals and PDF export to the Paycenter admin app that allowed for easier customer POS application review.
- Revamped the ease of data access for agents of the Paycenter admin app through a backend Microservice built using Nest.js and TypeScript, thereby improving the ease of using the application by 75%.
- Improved the onboarding experience for new developers of the Paycenter admin app by documenting features in the Confluent wiki tool thereby reducing onboarding time by 80%.
